Introduction 1

Purpose 1.1

The site is a tourist company and reservations. The customer can book the trip through the company's website.

Scope 1.2

The site displays the flights and the number of nights of the trip on the home page for the customer to see it, but to choose the trip to him first to register on the site. After logging on the site can choose the trip and choose the number of days and will show the price of the trip. If not find the appropriate trip can send e-mail to the trip he wants and the admin will reply to him either by approving the trip or the rejection. Payment is either by cash or by visa. The customer makes a report on the trip and looks forward to this report manager..

Overview 1.3

The site consists of a manager, who is responsible for the work of emails for all those who work with the System .Admin is responsible for adding and modifying and delete trips .guide goes with tourists on trips. Financial manager is responsible for accounting the client on the price of the trip and adds to the company account..

Reference Material 1.4

We get reference material form real customer and teacher's assistant
